

VPN Setup Guide

- Download and install the OpenVPN client from:
<https://hatmsnas.highwaysenglandsdc.co.uk/remote-access/OpenVPN/OpenVPN.zip>
(Use the version pertinent to your pc/laptop – e.g., Windows 64Bit)
- Once installed, copy the 3 files sent to you to the following directory on your pc/laptop:
C:\Users*<your profile name>*\OpenVPN\config
(you may have to create these folder if they do not currently exist)

- In your system tray (*bottom right next to clock*), right click the OpenVPN icon and select “Edit Config”

- In the config file make sure the path names are correct and are pointing to the .key and .p12 files:
tls-auth "C:\\Users\\USER PROFILE NAME\\OpenVPN\\config\\NAME OF SYSTEM.key " 1
pkcs12 "C:\\Users\\USER PROFILE NAME\\OpenVPN\\config\\NAME OF USER.p12"
- Save config file
- Right click OpenVPN icon and select “Connect”, then enter your password:
